Date Funded (first funding):	May 15, 2009	City:	Glen Ellyn
Date Repaid ¹ :	N/A	State:	Illinois

¹If repayment was incremental, please enter the most recent repayment date.

American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP) and Community Development Capital Initiative (CDCI). To answer that question, Treasury is seeking responses that describe generally how the CPP/CDCI investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP/CDCI investment was deployed or how many CPP/CDCI dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP/CDCI capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP/CDCI funds were outstanding).

☒ **Increase lending or reduce lending less than otherwise would have occurred.**

While our total loans outstanding has remained relatively flat. New loan originations have been offset by reductions in problem assets. Loan demand in general remains weak.

☒ **To the extent the funds supported increased lending, please describe the major type of loans, if possible (residential mortgage loans, commercial mortgage loans, small business loans, etc.).**

New loans have been primarily comprised of Home Equity Lines of Credit and Owner Occupied Commercial Real Estate.

Community Financial Shares, Inc

☒ **Increase securities purchased (ABS, MBS, etc.).**

With slack loan demand excess funds have been invested in short-term agency bonds, MBSs, and CMOs.

☐ **Make other investments.**

☐ **Increase reserves for non-performing assets.**

☐ **Reduce borrowings.**

Community Financial Shares, Inc

What actions were you able to avoid because of the capital infusion of CPP/CDCI funds?

We believe that the CPP funds allowed us to avoid additional regulatory enforcement actions.

What actions were you able to take that you may not have taken without the capital infusion of CPP/CDCI funds?

The capital infusion at its most elemental level has allowed the bank to continue normal operations. Due to credit deterioration we have had to add significant funds to our provision for loan losses. The CPP funds provided us with a significant cushion that gave us the needed flexibility to deal with our credit issues in an aggressive manner. Without the CPP funds our capital ratios would be significantly lower today and possibly would have put the bank in a much worse position with the regulatory agencies.
